Mr. Andrew Williams
46 General Hospital Dr.
Stratford, ON N5A 2Y6

Monday, November 2, 2020

Dear Mr. Williams,

Enclosed you will find a copy of *Corona: False Alarm?*, a newly published book by Drs. Karina Reiss, PhD and Sucharit Bakdi, MD. In its pages, these two leading German scientists provide 246 citations showing how the supposedly “novel” coronavirus is not abnormally dangerous. It also details how the measures taken to contain this non-existent pandemic are unscientific, ineffective and harmful.

The book sold over 275,000 copies in its first six weeks in Germany. It currently ranks as the #1 bestseller on Amazon Canada in the category of Public Health Administration.

Professor Karina Reiss holds a PhD in biology and has received prestigious honours and awards for academic contributions in the fields of infection and biochemistry. Dr. Bhakdi has published over 300 articles in the fields of immunology, bacteriology and virology for which he has received the Order of Merit of Rhineland-Palatinate.

Their book confirms why we do not consent to unscientific, involuntary and harmful methods of disease control such as masking, lockdowns and social distancing. We do not consent to the use of PCR tests which are admitted by the FDA to be inadequate and unapproved for detecting a virus (which has not been isolated or proven to have anything to do with symptoms attributed to COVID-19).

Those continuing to enforce corona-control measures, which are costing lives and destroying the economy, can no longer claim ignorance before the avalanche of evidence. They will be held liable and responsible. Instead of cooperating with these international, corporate and political agendas; please help lead society away from this self-destructive “new normal” servitude.

Please read the book and realize that the information and guidelines being handed down to you from the WHO, via the Ministry of Health, are not to be trusted.

Sincerely,

John C. A. Manley

Nicole P. Manley
